

ANTIBACTERIAL AND ANTIFUNGAL ACTION

Fighting bacteria and fungi is one of the main missions of Regenactiv fabric. Results of the analysis performed show some surprising figures:

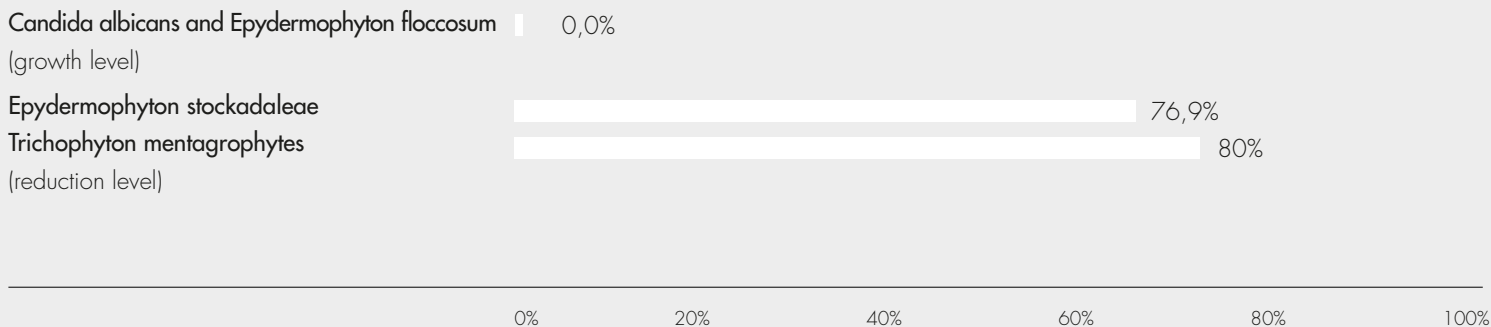

GRAM-POSITIVE BACTERIA

GRAM-NEGATIVE BACTERIA

FUNGI SUCH AS

* **Antimicrobial coverage** (ASTM 100 test on Regenactiv fabric).

We are working on a study of a wider spectrum from which we hope to obtain results soon to assess which are the coverages against fungi/bacteria that we have. The following bacteria are the most frequently analyzed but we are considering broadening the spectrum analyzed in the new study.
